

Template 3.

A sleek, horizontal design for a "Topic Selection" or "Feature" section, using a modern dark-mode and glassmorphism aesthetic. The design is minimalist and uncluttered, utilising consistent padding and a professional colour palette of Oxford blue and dodger blue. The overall look is technical, futuristic, and high-contrast.

Key elements include:

Background & Main Container: A wide, Oxford Blue (#052438) rectangular card with heavily rounded corners. The card is set against a Platinum Blue (#E6ECF2) background. asset : Oxford_Blue_Base.png

Header Accent: Directly above the main dark container sits a thin, horizontal pill-shaped bar in a vibrant dodger blue, acting as a stylistic header or progress indicator. The dodger blue loading bar asset is named Loading_Bar.png. Its Oxford blue base is Loading_Bar_Base.png.

Key elements include:

Three-Column Layout: Inside the dark container, three icons are arranged side-by-side with equal spacing:

- **Iconography:** Each column features a large icon of a topic or subject detailed in the script. The icon is Minimalist, thick-stroke line art with a "monoline" weight. The edges and corners are slightly rounded to feel friendly yet professional. **Primary Body:** A crisp white outline defines the subject. **Accent Detail:** A vibrant **dodger blue** highlights a particular part of the icon. Example: a rocket icon's body would be white but its propulsion flames would be dodger blue. Example 2- a document icon would be white but an add icon within the document would be dodger blue. I've attached three icons. Change their colours
- **Label Buttons:** Beneath each icon is a rounded rectangular "pill" button in dodger blue (asset: Pill_Box_1.png). There is white text inside that pill that describes the icon

Interpretable elements: **Text that sits within the label buttons. The text should be satoshi black 37px.**

1. Learning Goals

This design supports **Identification** and **Classification**. Use it when you want the learner to:

- **Differentiate Categories:** Recognize three distinct groups, roles, or types within a single system.
- **Deconstruct a Whole:** Break a complex topic into three manageable pillars or "buckets."
- **Define Scope:** Establish the three main areas a lesson will cover (serving as a visual syllabus).
- **Establish Parallels:** Show that three different items are governed by the same "rule" (the dark container).

2. Practical E-Learning Use Cases

The "Stakeholder Breakdown" (Management/HR)

- **The Content:** Direct Reports (Left), Peers (Middle), Executives (Right).
- **The Icons:** Each shows a different "person" icon with a dodger blue accent on their specific tool (e.g., a briefcase, a speech bubble, or a crown).
- **The Narrative:** "To lead effectively, you must communicate differently with these three groups."

The "Service Menu" (Software/Onboarding)

- **The Content:** Basic Features, Pro Tools, Enterprise Support.
- **The Icons:** White outlines of tools with blue accents on the "plus" or "star" features.
- **The Narrative:** "Depending on your subscription, you'll have access to these three core pillars."

The "Three Pillars" (Company Values/Compliance)

- **The Content:** Honesty, Transparency, Privacy.
- **The Icons:** A shield, a magnifying glass, and a lock—all with blue accents on the "security" or "glass" elements.
- **The Narrative:** "Our code of conduct is built on three foundational values."
