

Word Definition Template.

A sleek and modern template for a Word Definition page, resembling a professional dictionary entry. The design employs a professional dodger blue (#0496FF) and platinum blue (#E6ECF2) colour palette, integrated with soft drop shadows to achieve a layered "glassmorphism" effect. The background is a clean, uncluttered platinum blue gradient with ample space. All text is left aligned

Assets for you to reference include:

- **Word_Definition_Banner.png** : A rounded dodger blue square containing the text "Word Definition" in a bold, white, Inter Extrabold font at 74px.
- **Icon_Pill.png** : A prominent circular blue button enclosed within a larger white rounded shape. The blue circle features a clear white icon of a document with a plus sign (+), symbolising an "Add New" or "Create Entry" function.
- **Background.png** : This PNG file stays at the base, behind everything.

Assets for you to interpret include

- **Centre-Left:** Two lines of left aligned text:
 - **Definition Title (First Line):** Rendered in a strong, black, Inter bold font at 74px.
 - **Definition Description (Second Line):** Rendered in a slightly lighter shade and a clean, Satoshi Medium font at 55.5px. This expands further and provides context for the Definition Title

Animation Principles

Background.png is on screen from the start. **Word_Definition_Banner.png** starts off screen and pans down vertically, easing into a stop with a smooth fluid motion from timestamps 0:00:00:00 to 0:00:01:14. **Icon_Pill.png** also starts off screen, coming in from the right which starts at 0:00:00:00 before settling into its final position at 0:00:01:14, all in a smooth easy eased motion- similar to the pace of the movement on **Word_Definition_Banner.png**. They both settle into their final positions at the same time.

Placeholder text **Definition Title (First Line)** - Which you will interpret from the script - unspools from left to right, one letter at a time. Each individual character performs a quick, soft fade-in from 0% to 100% opacity as it appears. The motion is staggered and sequential, creating a smooth, flowing typewriter effect. It begins at 0:00:00:00 and ends at 0:00:01:09.

Placeholder text **Definition Description (Second Line)** - Which you will also interpret from the script - has an opacity fade but all at once. Its fade is offset slightly from **Definition Title (First Line)**, beginning at 0:00:00:20 and ending at 0:00:02:20
