

Template 9

A clean, minimalist vertical list designed to guide the viewer through a multi-step process or a series of key points. This layout uses a sophisticated **proximity-based focus effect** to highlight active content while subtly receding inactive information.

Color Palette

- **Background:** Platinum Blue (#E6ECF2).
 - **Active Status Circle:** Dodger Blue (#0496FF) with a Pure White (FFFFFF) checkmark.
 - **Inactive Status Line:** Dotted Dodger Blue (#0496FF) vertical path.
 - **Content Cards:** Pure White (FFFFFF).
 - **Icon Squares:** Linear Gradient of Dodger Blue (#0496FF)
 - **Text (Title):** Black. Font- Inter Bold. Size- 37px
 - **Text (Body):** Medium Gray (#707070) for secondary descriptions. Font- Satoshi Regular. Size- 33px
-

Layout & Key Elements

The Status Spine (Center-Left)

- A vertical dotted line acts as the "track" for the progression.

Base asset: Dotted_Line_Base.png

Blue progress bar asset: Blue_Dotted_Line_Base.png

- Circular checkmark icons act as milestones, populating as the focus moves down the list.

Dodger blue base asset: Tick_Base.png

Tick asset: Tick.png. Use trim paths animation to make it look like a tick

The Content Cards (Right)

- A vertical stack of five stadium-edged rectangular cards.
- **Icon Integration:** Each card features a blue gradient square containing a white directional arrow icon.

Asset: Pill_Base.png

- **Text Hierarchy:** Features a bold "Title" (Satoshi Bold) and a lighter "Description" sentence underneath.
-

Animation Logic (The "Proximity Trigger")

This template utilizes a specialized **Null-object proximity trigger** in After Effects to automate the focal point.

Phase 1:

- The content cards fade in sequentially from top to bottom at a baseline **70% opacity**.

- The vertical dotted spine draws on from the top down.

Phase 2:

- **The Trigger:** As a hidden "Null" object passes over a card, it triggers two simultaneous reactions:
 1. **Scale:** The active card scales up slightly (approx. 105%) to pop forward.
 2. **Opacity:** The active card's opacity increases to **100%**, while all other "inactive" cards remain or revert to **70%**.
- **The Checkmark Sync:** As the Null passes a milestone, the blue checkmark circle appears, signaling completion of that step.

Phase 3:

- As the Null moves to the next box, the previous box scales back down and dims to 70% opacity.
 - This creates a "spotlight" effect that moves fluidly through the list, ensuring the viewer's eye is always on the current talking point.
-

Design Strategy

This is your **"Process Narrator."** By using the proximity trigger, you eliminate visual clutter and force focus onto a single item without removing the context of the surrounding list. It is highly effective for voice-over synchronization, where the "glow" follows the speaker's pace.
