

Template 13

A centered, high-impact layout designed for presenting a sequence of independent ideas or key takeaways. This design uses a **vertical "falling" animation** to cycle through content, creating a physical sense of stacking or discarding cards.

Color Palette

- **Background:** Platinum Blue (#E6ECF2).
 - **Card Header:** Vibrant Dodger Blue (#0496FF) linear gradient.
 - **Card Body:** Deep Oxford Blue (#052438).
 - **Card Iconography:** Pure White (#FFFFFF) with Dodger Blue (#0496FF)
 - **Header Icon:** Pure White (#FFFFFF) circular "+" interface icon.
 - **Text:** Pure White (#FFFFFF).
-

Layout & Key Elements

The Central Focus Card

- A large, centered, rounded-corner card that dominates the screen.

Asset: Card_header.png

- **The Header:** A solid blue gradient bar containing a circle bookmark icon (Asset: circle-bookmark.svg) and a bold title (e.g., "Paste Title Pill one") in Inter Bold Font, sized at 55px .
- **The Main Graphic:** A large, clean line-art icon from the icon library centered within the dark card body, reinforcing a theme.

The Stack Logic

- Only one card is fully visible at a time, but the animation reveals a hidden stack of five cards total. Each card has a different icon and title.
-

Animation Logic (The "Falling Stack")

This template utilizes a **dynamic Z-space or Y-axis displacement** to simulate a physical deck of cards.

Phase 1:

- The first card ("Title Pill one") enters the frame, settling in the center to establish the first point.

Phase 2:

- **The Drop:** As the presentation moves to the next point, the current card "falls" or slides downward out of the frame.
- Simultaneously, the next card ("Title Pill Two") is already underneath the falling card to take its place.
- **The Visual Overlap:** During the transition, cards appear to overlap briefly, creating the illusion of a physical stack being shuffled from top to bottom.

Phase 3:

- This "drop-and-replace" motion repeats through all five cards.
- The motion is super smooth and very rhythmic, designed to keep the viewer engaged as each new title and icon resets the focus.

Design Strategy

This is your **"Flashcard Summary" layout**. By showing only one point at a time in the center of the screen, you remove all distractions. It is the perfect tool for a rapid-fire list of "Top 5" tips or "Key Takeaways" where you want the audience to focus on one specific thought before moving decisively to the next.
